

# ULTIMATE

## METAL TREATMENT

Surface appearance, performance, and function remain unaltered

Transparent at 100-200 nanometers

Repels contaminants and buildup

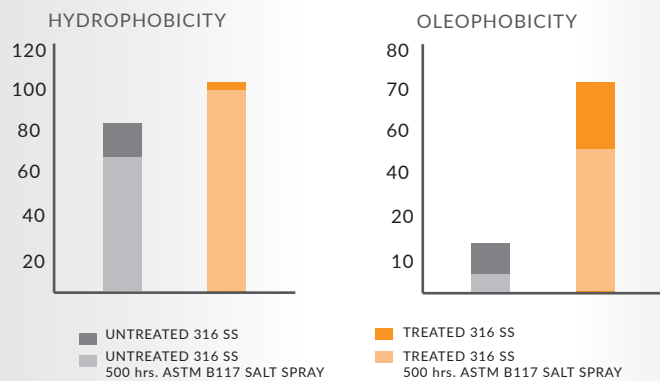

Application engineered

Temperature resistant up to 305°F

### LONG TERM RELIABILITY TESTING

### INNOVATIVE ASSET PROTECTION

e9 Treatments offers a history of success treating metals to repel organic and inorganic materials in harsh environments. Surfaces treated with e9 Ultimate Metal Treatment are oleophobic and hydrophobic, abrasion and chemically resistant, and easy to clean. Our staff of application engineers consult with customers to optimize the implementation plan of an e9 Ultimate treatment.

### VERSATILE APPLICATIONS

- INDUSTRIAL MACHINERY
- CHEMICAL BLENDERS
- AUTOMOTIVE COMPONENTS
- ELECTROCHEMICAL CELLS
- CERAMIC KILNS

### REPEL CONTAMINANTS & PROTECT ASSETS

### RESIST ABRASION

e9 Ultimate Metal Treatment is a combination of the e9 Pro Series Metal Treatment and e9 Advantage Metal Treatment. The treatment combination provides hydrophobic and oleophobic properties with greater resistance to abrasion. The treated surface is not altered in appearance or functionality. Contact your e9 Treatments Sales Manager to determine if Ultimate is the right surface treatment solution for you.
