Section 5. Fire Fighting Measures			
SUITABLE/UNSUITABLE EXTINGUISHING MEDIA	Non-combustible. Use fire extinguishing methods suitable to surrounding conditions. Foam. Fire-extinguishing powder. Carbon dioxide.		
SPECIFIC HAZARDS (IE HAZARDOUS COMBUSTION PRODUCTS)	Formation of toxic gases is possible during heating or in case of fire. Hydrogen fluoride (HF) Carbon monoxide Carbon dioxide		
SPECIAL PROTECTIVE ACTIONS FOR FIRE FIGHTERS	When fire fighting conditions are severe and total thermal decomposition of the product is possible, wear full protective clothing, including helmet, self contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head.		
Section 6. Accidental Release Measures			
PERSON PRECAUTIONS, PPE	Ensure adequate ventilation. Wear protective equipment. Keep unprotected persons away. Keep away from ignition sources.		
ENVIRONMENTAL PRECAUTIONS	Do not allow to enter sewers/ surface or ground water. Prevent from spreading (e.g. by damming-in or oil barriers) Inform respective authorities in case of seepage into water course or sewage system.		
METHODS & MATERIALS OF CONTAINMENT & CLEANING	Contain spill. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Collect as much of the spilled material as possible. Clean up residue with an appropriate organic solvent. Seal the container. Send for recovery or disposal in suitable receptacles.		

Section 7. Handling and Storage**PRECAUTIONS FOR SAFE HANDLING**

Ensure good ventilation/exhaustion at the workplace. Do not breathe thermal decomposition products. Avoid skin contact with hot material. For industrial or professional use only. Store work clothes separately from other clothing, food and tobacco products. Avoid release to the environment.

Avoid contact with oxidizing agents (eg. chlorine, chromic acid etc.) No smoking: Smoking while using this product can result in contamination of the tobacco and/or smoke and lead to the formation of hazardous decomposition products.

Keep away from heat and direct sunlight.

CONDITIONS FOR SAFE STORAGE

Store in cool, dry conditions. Keep container tightly sealed. Only use containers compatible with the product. Store only in unopened original receptacles.

Do not store together with oxidising and acidic materials as well as heavy metal compounds.

Section 8. Exposure Controls/Personal Protection

COMPONENT	PEL/TWA/STEL	CONTROL PARAMETER	AGENCY	CAS
METHYL NONAFLUOROBUTYL ETHER	TWA	750 ppm	AIHA	163702-07-6
METHYL NONAFLUOROISOBUTYL ETHER	TWA	750 ppm	AIHA	163702-08-7

VENTILATION /ENGINEERING CONTROLS

Provide appropriate local exhaust when product is heated. Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapors/spray. If ventilation is not adequate, use respiratory protection equipment.

SKIN PROTECTION

Wear protective gloves.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Consider penetration times, rates of diffusion and the degradation of material when selecting gloves.

MATERIAL OF GLOVES

Reinforced nitrile rubber, NBR

Suitable gloves not only depend on material, but also on manufacturing quality. Gloves should be checked prior to use for good manufacturing quality.

Penetration time of glove material The exact breakthrough time of the glove material has to be found out by the manufacturer of the protective glove and has to be observed.

RESPIRATORY PROTECTION

Use suitable respiratory protective device in case of insufficient ventilation.

THERMAL HAZARDS

Wear heat insulating gloves when handling hot material to prevent thermal burns.

EYE PROTECTION

Wear safety glasses with side shields.

CLOTHING

Use protective suit.
