

Original Equipment Manufacturers  
e9 Pro Series Metal Treatment

## Power Up Your Product Offering

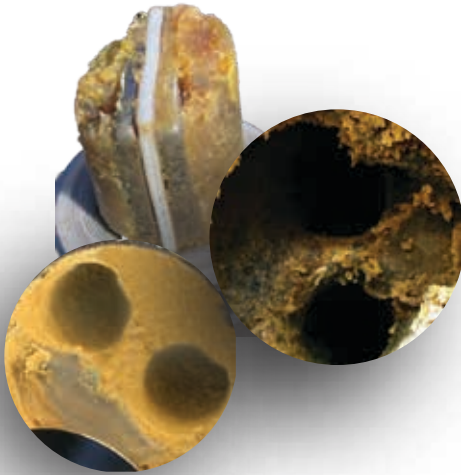

Treat Your Equipment with e9 Pro Series Products  
Add Value by Reducing Future Maintenance for your Customers

Win sales over the competition by providing the latest in product innovation. Treat the surfaces of your equipment with e9 Pro Series products to protect from unwanted buildup and fouling.

Advantages of treating your product line:

- Add value to products
- Extend functional product life 3X-8X
- Reduce frequency of corrective maintenance
- Differentiate your products from your competitor's products
- Offer longer-lasting, lower maintenance equipment
- Increase revenue

We can offer multiple approaches to work within your manufacturing process or service offering. Partner with e9 Treatments™ and start treating your product line today! [Call us at 210.742.1051.](tel:210.742.1051)

Treat a variety of instrumentation from flow meters, Coriolis meters, multiphase meters, turbine meters, vortex meters, valves and more. Our products excel at helping to deter buildup in many applications, including flow and immersion.

## BENEFITS

Extended functional life of products

Designed tolerances, specifications, conductivity, & function remain unaltered

No change to surface appearance, will not flake, chip or delaminate.  
Transparent at <10 nanometers thin

Repellent to many contaminants, pH resistant from 2-12

Temperature resistant up to 305 F

Environmentally friendly, nonflammable formula, non-ozone depleting

# PRO SERIES

## HOW e9 PRO SERIES WORKS

Metals naturally have high surface energy, which causes them to attract buildup and deposition of material on their surfaces. These deposits bond to the surface of the metal and become very hard to remove, as shown in the top example at right.

e9 Pro Series Treatments use nanotechnology to modify the surface characteristics of the metal and lower its surface energy. The lower surface energy of the metal attracts less deposition. With this invisible layer of repellency and protection, deposits are less likely to settle on the surface and those that do are less likely to bond to the surface, making it easier to clean.

## RECOMMENDED SURFACES

e9 Pro Series Treatments can successfully treat a wide range of metals, including:

- Stainless Steels
- Galvanized Steel
- Hastelloy
- Aluminum
- Titanium
- Brass
- Copper
- Bronze
- Nickel
- Gold
- Silver
- Zinc

And others. Ask us about your application.

## RESULTS THAT SPEAK FOR THEMSELVES

It's all about the results. The graph below shows how treating your equipment with e9 Treatments can increase the number of days of interruption free service. Results are application and environment specific, but we can ensure that you will have extended in-service time with a properly cleaned and treated device.
